Objective of Basant Panchami

The objective of celebrating Vasant Panchami is to express and enjoy the Bliss from the newly generated chaitanya and creation in Nature.

To get enlightenment with knowledge, Devotees, especially from the education sector, like students, teachers, worship Goddess Saraswati on the big day. Many educational institutions arrange special prayers or pujas in the morning to seek the blessing of the goddess. Poetic and musical gatherings are held in some communities in reverence for Saraswati.

Report - Basant Panchami Utsav

Dedicated to Goddess Saraswati, Basant Panchami marks the arrival of the Spring season in India. Saraswati is the Goddess of knowledge, music, learning and arts. It is believed that without her blessings, the world would be shrouded in ignorance, as she represents enlightenment.

A special assembly on the occasion of Basant Panchami was conducted by the students on 5th February, 2022. The students and teachers were dressed in yellow coloured attires. The celebration commenced with rendition of Saraswati Vandana. Thereafter, children were apprised regarding the significance of celebrating the festival. As the assessments are round the corner, it was conveyed to the students that they must define their goals, prioritize their studies, plan and schedule their lessons so that they can attain success. Teachers also conveyed their best wishes to the young learners.

Sarju Sagar Dam also known as Kot Dam is a dam across the Shakambhari Hills. It is situated 13 kilometres from Udaipurwati town in Jhunjhunu, Rajasthan, India. The dam was constructed between 1923 and 1924 for the purposes of Irrigation and Water Storage.

Height: 7.6 m & Opened: 1924

Wetlands are lands saturated with water permanently or seasonally. Wetlands are typically defined by three characteristics:

- 1) The area is saturated or flooded at least part of the year
- 2) The presence of hydric soil
- 3) The presence of plant life that thrives in wet conditions

Wetlands vary widely due to regional and site-specific differences in soil, topography, climate, hydrology, water chemistry, vegetation and other factors. WHC Conservation Certification defines wetlands as areas that are inundated and/or saturated by surface or groundwater at a frequency and duration sufficient to support vegetation adapted for life in saturated soil conditions.
