## **Introduction:**

---

Malwares are software that replicates itself and spreads by damaging and deleting the files. These viruses enter in device via attached images, audio/video files, downloads etc.

## **Objectives:**

---

- To understand the type of malware and its functionality.
- Determine how the system was infected by malware and define if it was a targeted attack or a phishing attack.
- How malware communicates with attacker.
- Future detection of malware and generating signatures.

## **About Event:**

---

A Class Room Seminar was organized by PIMS department of Seth G. B. Podar College, Nawalgarh by Advance learners to polish their skill of presentation and improve confidence to achieve desired result by presenting themselves in the front of participants and listeners. This is a departmental activity to develop advance communicative skills and also a part of pre placement activities. In this seminar all PIMS faculty members (BBA & BCA) Prof. Rajesh Verma, Prof. Narendra Saini, Dr. Uma Soni, Ms. Rachna & Prof. Mukesh Saini were present there. Dr. Uma Soni Started the seminar by telling the importance of conducting class room Seminar. Presenter shared his knowledge about Definition of Malwares, Types of Malwares and Protection from Malwares. Discussed some related points as given below:

## **Types of Malwares:**

---

1. Viruses
2. Trojan horse
3. Spyware
4. Adware
5. Worms

6. Backdoors
7. Key loggers

**Protection from Malwares:**

---

1. Use antivirus for protection.
2. Keep system and software updated.
3. Think twice before clicking links or downloading anything.
4. Be careful about opening email attachments or images.

In the end Prof. Mukesh Saini concluded the seminar by appreciating presenter of PIMS department and told that in future also seminar should continue like this. Head of Department of BCA told that this type of class room seminars work as a motivator for creative and advance learner students.

**SETH G.B. PODAR COLLEGE, NAWALGARH**

**CLASS ROOM SEMINAR**

**ON**

**“COMPUTER MEMORY”**

**Seminar Title : Computer Memory**

**Presentation Venue : PIMS Room No. 41**

**Date : 15/03/2022**

**Duration : 01.00 pm to 02.00 pm**

**Organized by : PIMS Department**

**Present : Prof. Rajesh Verma, Prof. Narendra Saini,  
Prof. Mukesh Saini, Ms. Rachna & Dr. Uma Soni**

**Delivered by : BCA Students**

**Beneficiaries : 35 Students (All BBA & BCA)**

**Distribution : IQAC & Principle Office**

**Introduction:**

A memory is just like a human brain. It is used to store data and instructions. Computer memory is the storage space in the computer, where data is to be processed and instructions required for processing are stored. Computer memory is any physical device capable of storing information temporarily like RAM or permanent like ROM.

**Objectives:**

---

- To understand the type of Computer Memory and its functionality.
- Define the benefits of computer memory.
- Stores the program that can be executed within a short period of time.
- Stores data for further use.
- How Computer Memory communicates with programmer.

**About Event:**

---

A Class Room Seminar was organized by PIMS department of Seth G. B. Podar College, Nawalgarh by Advance learners to polish their skill of presentation and improve confidence to achieve desired result by presenting themselves in the front of participants and listeners. This is a departmental activity to develop advance communicative skills and also a part of pre placement activities. In this seminar all PIMS faculty members (BBA & BCA) Prof. Rajesh Verma, Prof. Narendra Saini, Dr. Uma Soni, Ms. Rachna & Prof. Mukesh Saini were present there. Dr. Uma Soni Started the seminar by telling the importance of conducting class room Seminar. Presenter shared his knowledge about Definition of Computer memory, Types of Memory and difference between different types of computer memory. Discussed some related points as given below:

## **Types of Computer Memory:**

---

8. Primary Memory
  - a. RAM
  - b. ROM
9. Secondary Memory

## **Characteristics of Main Memory**

---

- These are semiconductor memories.
- It is known as the main memory.
- Usually volatile memory.
- Data is lost in case power is switched off.
- It is the working memory of the computer.
  - Faster than secondary memories.
  - A computer cannot run without the primary memory.

## **Secondary Memory**

---

This type of memory is also known as external memory or non-volatile. It is slower than the main memory. These are used for storing data/information permanently. CPU directly does not access these memories; instead they are accessed via input-output routines. The contents of secondary memories are first transferred to the main memory, and then the CPU can access it. For example, disk, CD-ROM, DVD, etc.

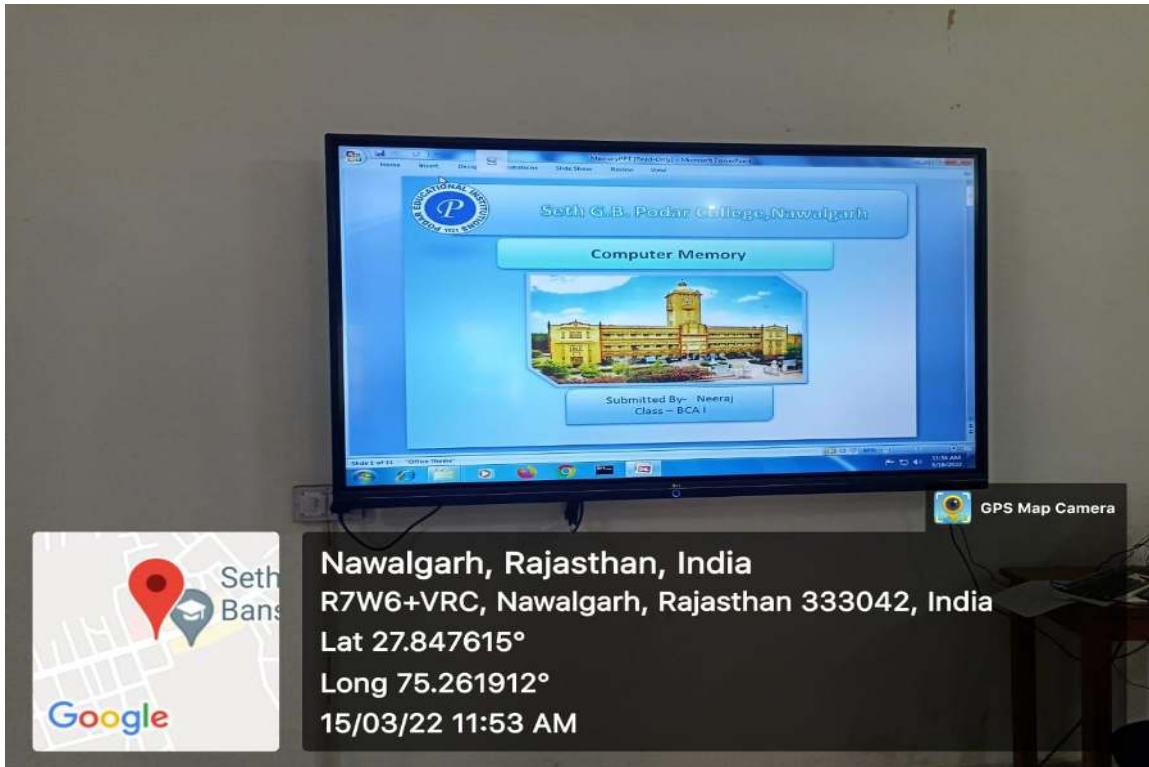

## Characteristics of Secondary Memory

---

- These are magnetic and optical memories.
- It is known as the backup memory.
- It is a non-volatile memory.
- Data is permanently stored even if power is switched off.
- It is used for storage of data in a computer.
- Computer may run without the secondary memory.
- Slower than primary memories.

In the end Prof. Mukesh Saini concluded the seminar by appreciating presenter of PIMS department and told that in future also seminar should continue like this. Head of Department of BCA told that this type of class room seminars work as a motivator for creative and advance learner students.

**SETH G.B. PODAR COLLEGE, NAWALGARH**

**CLASS ROOM SEMINAR**

**ON**

**“BLUE EYES TECHNOLOGY”**

---

**Seminar Title : Blue Eyes Technology**

**Presentation Venue : PIMS Room No. 41**

**Date : 15/03/2022**

**Duration : 12.00 am to 01.00 pm**

**Organized by : PIMS Department**

**Present : Prof. Rajesh Verma, Prof. Narendra Saini,  
Prof. Mukesh Saini, Ms. Rachna & Dr. Uma Soni**

**Delivered by : BCA Students**

**Beneficiaries : 35 Students (All BBA & BCA)**

**Distribution : IQAC & Principle Office**

## **Introduction:**

---

The blue eyes technology works on Artificial Intelligence. It aims to give human abilities to a computer. The aim of the blue eyes technology is to give human power or abilities to a computer so that the machine can naturally interact with human beings as humans interact with each other, through speech, facial expressions and touch.

## **Objectives:**

---

- To understand the blue eye technology and its uses.
- To develop a computational machine having sensory and perceptual ability like those of humans.
- To understand Artificial intelligence.
- To provide the coordination and communication between the two units.
- To Detect Human emotions.

## **About Event:**

---

A Class Room Seminar was organized by PIMS department of Seth G. B. Podar College, Nawalgarh by Advance learners to polish their skill of presentation and improve confidence to achieve desired result by presenting themselves in the front of participants and listeners. This is a departmental activity to develop advance communicative skills and also a part of pre placement activities. In this seminar all PIMS faculty members (BBA & BCA) Prof. Rajesh Verma, Prof. Narendra Saini, Dr. Uma Soni, Ms. Rachna & Prof. Mukesh Saini were present there. Dr. Uma Soni Started the seminar by telling the importance of conducting class room Seminar. Presenter Shared his knowledge about Blue Eye Technology, explain Monitoring Human Operator and Intelligence sensing System. Discussed some related points as given below:

Blue eyes technology consist of,

10. Mobile measuring device or Data Acquisition Unit (DAU)
11. Central System Unit (CSU)
12. The Hardware

In the end Prof. Mukesh Saini concluded the seminar by appreciating presenter of PIMS department and told that in future also seminar should continue like this. Head of Department of BCA told that this type of class room seminars work as a motivator for creative and advance learner students.
