Title : “One Day International Workshop on “Raptor conservation in south Asia and association with Mediterranean Flyway ””

Key Note Speaker : **Vladimir Dobrev**, Egyptian vulture conservation officer, БДЗП/Birdlife Bulgaria 4000 Plovdiv, 5 Leonardo da Vinci str & **Àlvar Seguí Romà**, Head of Biodiversity, MÀQUIA

Attended by : All UG and PG Students

Distribution : IQAC & Principal Office

Organized by: PG Department of Zoology, Seth Gyaniram Bansidhar Podar College,
Nawalgarh

Seeking Permission for organize One Day International Workshop on Raptor conservation in south Asia and association with Mediterranean Flyway (04th Feb 2022)

From: daulal bohara (daulalbohara@yahoo.com)

To,

Date: 24/01/2022

The Principal,

Seth G. B. Podar College, Nawalgarh

Jhunjhunu (Rajasthan)

Subject:- Seeking Permission for organize *One Day International Workshop on Raptor conservation in south Asia and association with Mediterranean Flyway (04th Feb 2022)*

Sir,

In accordance to subject cited above , I Dr Dau Lal Bohra , Head of the Department of Zoology , here with this letter requesting you to give a permission to organize "*One Day International Workshop on Raptor conservation in south Asia and association with Mediterranean Flyway (04th Feb 2022)*". I also request you to provide all the needed facilities.

Thanking you

Yours sincerely

Dr Dau Lal Bohra, PhD, F.A.B.Sc., F.S.E.Z.R
CCM (Clinical Microbiology),
Head, P G Department of Zoology,
Seth G B Podar College, Nawalgadh , Rajasthan, INDIA

Dear Àlvar Seguí Romà,
Head of Biodiversity, MAQUIA

As per our discussion, I Hartley invite to give lecture on "Griffon vulture recovery plan at southern Spain, method and materials used" One Day International Workshop on Raptor conservation in south Asia and association with Mediterranean Flyway (04th Feb 2022) 11.00 AM (Indian Time).

Please confirm the same.

Thanks

Dr Dau Lal Bohra,
Head, P.G. Department of Zoology,
Seth G. B. Podar College, Nawalagarh
"Conservation status of vulture in North India"

The Egyptian vulture – a species under threat

The Egyptian vulture (*Neophron percnopterus*) is recognized as globally ‘Endangered’(EN). It was uplisted in 2007 due to rapid population declines in most of its range, especially across Europe, Africa and India. It is listed in the EU Birds Directive (Annex I), the Bern Convention (Appendix II), the CMS (Appendix II), and the CITES (Appendix II).

Range and focus of Action Plan

The Egyptian vulture is a long distance migrant, and is found throughout Eurasia and Africa. The population that is targeted by this Action Plan breeds across the Balkans, Central Asia and Caucasian region, and migrates to wintering grounds that largely overlap with the range of the resident population of the same species in the Middle East, Central and East Africa. The major threats along the flyway that are addressed by this plan are poisoning, electrocution and collisions with energy infrastructure, and direct persecution. Mostly, the drivers pushing the different stakeholders’ activities that threaten the species are economic; most (if not all) stakeholder groups lacked awareness of the affect of their activities have on the conservation status of the Egyptian vultures. The Action Plan seeks to consider the following needs: long-term research and monitoring; designation of protected areas (non-EU); building conservation capacity; improving exchange of information; coordination of NGO driven initiatives; partnerships with industry (e.g. energy, agriculture); and improving awareness-raising and publicity.

Framework for action

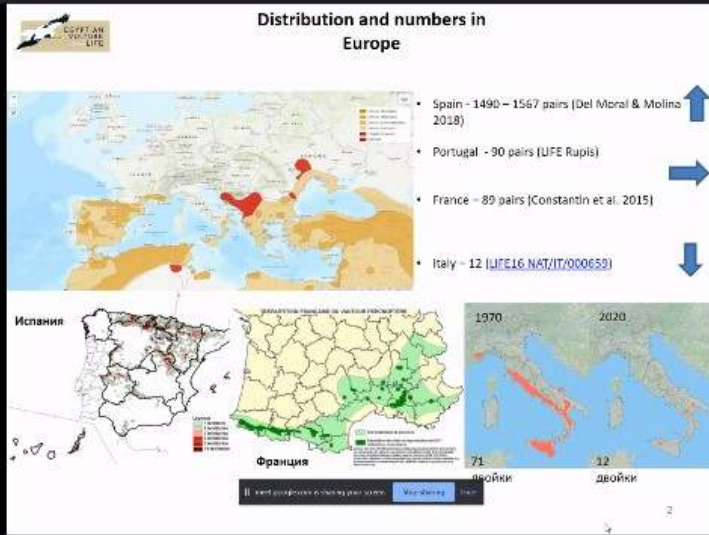

The overall long-term goal of the Action Plan is to improve the conservation status of the Egyptian vulture, leading initially to its downlisting to Vulnerable and eventually achieving a

favorable conservation status of the species across FAP range. In shorter term, by 2026 the EVFAP seeks to halt the downward trends in the declining meta-populations while maintaining stable or increasing trends for the healthy ones. More specifically, through 67 actions the EVFAP aims to significantly reduce Egyptian vulture mortality in the FAP range due to poisoning, illegal killing, electrocution and collision with energy infrastructures; enhance the size and productivity of breeding populations; and ensure endorsement and effective implementation of the the EVFAP by all Range States.

Delivery and coordination

It is envisaged that the EVFAP will be implemented over a 10-year period (2017 – 2026). It should be reviewed every five years (with the first review in 2021), and updated every 10 years (first update due in 2026). An emergency review will be undertaken if there is a sudden major change liable to affect one of the populations.
