Counseling for slow learners

The PIMS (BBA & BCA) department follows a well planned and documented process to ensure effective delivery of curriculum. The department pays special emphasis on this as the mission of the college is also to impart quality education. Although the department takes all steps possible to deliver the curriculum in time, there are some students who have low grasping power (for whatever reason) and they are unable to comprehend the teachings. Such students are classified under slow learners.

To keep such students updated and in line with fast learners, the department follows various remedial actions so that the slow learners are not left out. Following are the important steps taken by the department for slow learners.

- Remedial (extra) classes

The department makes arrangement for remedial classes for slow learners. The topics of such sessions are meticulously planned with focus on important topics. Only important topics are chosen as the time constraints available for remedial classes.

- Assignments

Remedial classes are supplemented with assignments; again this is an important indicator of student's performance. Students are instructed and trained on how to write assignments. This also helps to hone the writing skills of the student. Assignments also help students to understand a topic deeply and clearly.

- Study notes

Study notes is the traditional method of the learning process and has proved to be very successful over the years, this is the reason students are still given study notes in this day and age. Department still follows this method and important notes are shared with students in soft as well as hard copies.

- Group study

Group study is again a traditional method of teaching learning adopted since a long time. We believe in this method since it creates a positive vibe among students. Another factor which comes into play is peer pressure, this factor is taken in a positive manner with good sportsman spirit. Fast learners are also a part of these sessions to act as a motivator and inspiration. This method is well received by the students showing positive results

- Group Discussion

Group Discussion is one of the activities which bring the creative thinking from the minds of the students. GD provides a perfect platform for the students to come up with their unique ideas and thoughts. The other big benefit is G.D. hones the communication skills of the students. It also provides a sense of satisfaction when a student speaks in the discussion, apart from this it also teaches professionalism and dynamics of working in a team. This is the activity in which both slow learners and fast learners can participate and share their thoughts.

- Special test series

After completing a topic successfully, a series of tests is conducted to gauge the students learning's and to keep a check on students. This monitoring also helps to devise further

plans to suit the slow learners. Sometimes it becomes a challenge but the efforts of teachers always bears fruits in the long run.

- Counseling:

The department monitors the progress of slow learners from time to time during the remedial plan of action. Based on the above the department arranges counseling sessions for students who are not yet up to the mark even after the remedial action. Counseling sessions are arranged for such students. The main objective is to identify the root cause of his/her poor performance, the department believes that many a times it is possible that the students is going through a period of depression or anxiety which could very well the reason for poor performance. The department also talks to the guardians if need arises as many times the problem is related to family matters. The department has been successful in finding out the cause and resolving the problem. This has given valuable experience for the teaching staff of PIMS and there is a feeling of satisfaction in the minds of the lecturers.
