REPORT

On the occasion of World Heritage week, Department of Botany, Seth Gyaniram Bansidhar Podar College organized a workshop cum extension activity from 24-26 November 2022 for the students of M.Sc. Previous and Final. In the program total 30 students participated and know about the Heritage of Nawalgarh and their conservation. With this they aware the local people about Heritage and their conservation. The program was started with the inaugural speech by Dr. Satyendra Singh, Principal Seth Gyaniram Bansidhar Podar College, in the department of Botany, his speech he emphasis on the heritage and their conservation. After this on the first session Dr. Ravindra Goswami, Head Department of Botany gave his Heritage buildings in Nawalgarh and explain why in the present time there is a need to develop a habit of protect the heritage buildings.

In the second session held in Podar Museum Dr. Goswami explained the Preventive conservation techniques for conservation of Heritage building of Nawalgarh. The role of Preventive conservation is very important in the heritage conservation. With this Ms. Shyama Didwania train the participants for preventive conservation of Documentary Heritage.

On the second day Ms. Suman Saini explained simple measures of conservation and also with the participants did hands on practice session for the conservation methods in the Nawalgarh Haveli.

On the third day Dr. Ravindra Goswami, with the participants visit the havelis of the Nawalgarh and aware the local people for conservation and protection of Havelis.

Participants with the faculty aware the people about the heritage all around the Nawalgarh and students also instructed to do the activity regularly to conserve heritage collection of the city and also help to protect the glory of the city.

The program ended with the vote of thanks given by Ms. Suman Saini, Department of Botany.

CONCEPT NOTES:

Whenever we are talking about the conservation of any of building, we should learn about the concept behind the making of that building the points should remember before start conservation

- *The material used to build the building*
- *The architecture of the building*
- *The drainage system of the building*
- *The atmospheric condition*
 - *Temperature*
 - *Humidity*
 - *Sunlight*
 - *Rain pattern*
 - *Difference of day and night's environment*
 - *Difference of the condition changes during different weathers such as temperature, wind speed, sunlight etc*
- *The availability of materials*
- *The expert who aware about the building concepts (here the person knows about the concept of Fresco)*

The Common Preventive Conservation Can Implement to mitigate further damage or deterioration.

1. Regular cleaning,
2. The electric wires should be removed,
3. Proper drainage system should be in place,
4. Metal Drain pipes replaced with non-corroded material pipes,
5. The area where water stored should be repaired,
6. The Algal growth must be minimized by using some Algaecides but before using it check it if it does not chemically react with fresco,
7. The windows and doors should be closed properly while the portion is not in use,
8. The curtains of transparent heavy duty polyester film/melinex sheet can also be used to cover the fresco in the outer wall of the courtyard about a foot away from the frescoes when the Haweli closed after cleaning or not in use,
9. Adoption of appropriate pest control measures,

10. Regular removal of the vegetative growth on, in and outside the Haveli and,
11. Reversible remedial and restoration conservation treatments/methods should be applied.
