Affiliated to Pandit Deendayal Upadhyaya Shekhawati University, Sikar

## CERTIFICATE OF EXPERIENTIAL LEARNING DEPARTMENT OF GEOGRAPHY

This certificate is awarded to

Student Name - Abhishek Kumar Sharma

in recognition of successful completion of the B.A. Part I Geography Practical

Date - 20/02/ 2023

*This course provided fundamental skills and knowledge in geographical representation, data analysis, and surveying techniques, including:*

- **Cartography:** Understanding and applying various scales (simple, comparative, and diagonal) to create informative maps and diagrams.
- **Data visualization:** Constructing and interpreting diverse graphical representations like line graphs, bar charts, and specialized geographic graphs to analyze spatial data.
- **Weather analysis:** Interpreting weather maps, weather symbols, and instrument readings to understand atmospheric features and interpret daily Indian weather maps.
- **Relief representation:** Utilizing methods like hachure's, hill shadings, and contours to effectively illustrate different landforms on maps, and drawing cross-sections of various geographical features.
- **Basic surveying:** Understanding the purpose and types of surveying, and applying chain and tape surveying techniques like open and closed traverses to measure distances and map locations.

Abhishek Kumar Sharma has demonstrated proficiency in these skills, showcasing a strong foundation for further geographical studies.

Signature of Instructor

PROF. SUNIL KUMAR SAINI

ASSISTANT PROFESSOR

# SETH GYANIRAM BANSIDHAR PODAR COLLEGE

Recognition of college under Section 2(f)/12(B), UGC Act, 1956  
Affiliated to Pandit Deendayal Upadhyaya Shekhawati University, Sikar

## CERTIFICATE OF EXPERIENTIAL LEARNING DEPARTMENT OF GEOGRAPHY

This certificate is awarded to  
Student Name - Aditya Saini  
in recognition of successful completion of the B.A. Part I Geography Practical  
Date - 20/02/ 2023

*This course provided fundamental skills and knowledge in geographical representation, data analysis, and surveying techniques, including:*

- **Cartography:** Understanding and applying various scales (simple, comparative, and diagonal) to create informative maps and diagrams.
- **Data visualization:** Constructing and interpreting diverse graphical representations like line graphs, bar charts, and specialized geographic graphs to analyze spatial data.
- **Weather analysis:** Interpreting weather maps, weather symbols, and instrument readings to understand atmospheric features and interpret daily Indian weather maps.
- **Relief representation:** Utilizing methods like hachure's, hill shadings, and contours to effectively illustrate different landforms on maps, and drawing cross-sections of various geographical features.
- **Basic surveying:** Understanding the purpose and types of surveying, and applying chain and tape surveying techniques like open and closed traverses to measure distances and map locations.

## CERTIFICATE OF EXPERIENTIAL LEARNING DEPARTMENT OF GEOGRAPHY

This certificate is awarded to  
Student Name - Chandan Chejara  
in recognition of successful completion of the B.A. Part I Geography Practical  
Date - 20/02/ 2023

*This course provided fundamental skills and knowledge in geographical representation, data analysis, and surveying techniques, including:*

- **Cartography:** Understanding and applying various scales (simple, comparative, and diagonal) to create informative maps and diagrams.
- **Data visualization:** Constructing and interpreting diverse graphical representations like line graphs, bar charts, and specialized geographic graphs to analyze spatial data.
- **Weather analysis:** Interpreting weather maps, weather symbols, and instrument readings to understand atmospheric features and interpret daily Indian weather maps.
- **Relief representation:** Utilizing methods like hachure's, hill shadings, and contours to effectively illustrate different landforms on maps, and drawing cross-sections of various geographical features.
- **Basic surveying:** Understanding the purpose and types of surveying, and applying chain and tape surveying techniques like open and closed traverses to measure distances and map locations.

**Chandan Chejara has demonstrated proficiency in these skills, showcasing a strong foundation for further geographical studies.**

Signature of Instructor

**PROF. SUNIL KUMAR SAINI**  
**ASSISTANT PROFESSOR**

Date - 20/02/ 2023

*This course provided fundamental skills and knowledge in geographical representation, data analysis, and surveying techniques, including:*

- **Cartography:** Understanding and applying various scales (simple, comparative, and diagonal) to create informative maps and diagrams.
- **Data visualization:** Constructing and interpreting diverse graphical representations like line graphs, bar charts, and specialized geographic graphs to analyze spatial data.
- **Weather analysis:** Interpreting weather maps, weather symbols, and instrument readings to understand atmospheric features and interpret daily Indian weather maps.
- **Relief representation:** Utilizing methods like hachure's, hill shadings, and contours to effectively illustrate different landforms on maps, and drawing cross-sections of various geographical features.
- **Basic surveying:** Understanding the purpose and types of surveying, and applying chain and tape surveying techniques like open and closed traverses to measure distances and map locations.

Kuldeep Kumar has demonstrated proficiency in these skills, showcasing a strong foundation for further geographical studies.

Signature of Instructor

**PROF. SUNIL KUMAR SAINI**

## CERTIFICATE OF EXPERIENTIAL LEARNING DEPARTMENT OF GEOGRAPHY

This certificate is awarded to

Student Name - Neha Saini

in recognition of successful completion of the B.A. Part I Geography Practical

Date - 20/02/ 2023

*This course provided fundamental skills and knowledge in geographical representation, data analysis, and surveying techniques, including:*

- **Cartography:** Understanding and applying various scales (simple, comparative, and diagonal) to create informative maps and diagrams.
- **Data visualization:** Constructing and interpreting diverse graphical representations like line graphs, bar charts, and specialized geographic graphs to analyze spatial data.
- **Weather analysis:** Interpreting weather maps, weather symbols, and instrument readings to understand atmospheric features and interpret daily Indian weather maps.
- **Relief representation:** Utilizing methods like hachure's, hill shadings, and contours to effectively illustrate different landforms on maps, and drawing cross-sections of various geographical features.
- **Basic surveying:** Understanding the purpose and types of surveying, and applying chain and tape surveying techniques like open and closed traverses to measure distances and map locations.

Neha Saini has demonstrated proficiency in these skills, showcasing a strong foundation for further geographical studies.

Signature of Instructor

**PROF. SUNIL KUMAR SAINI**

**ASSISTANT PROFESSOR**

# SETH GYANIRAM BANSIDHAR PODAR COLLEGE

Recognition of college under Section 2(f)/12(B), UGC Act, 1956  
Affiliated to Pandit Deendayal Upadhyaya Shekhawati University, Sikar

## CERTIFICATE OF EXPERIENTIAL LEARNING DEPARTMENT OF GEOGRAPHY

This certificate is awarded to  
Student Name - Nikita Kumari  
in recognition of successful completion of the B.A. Part I Geography Practical  
Date - 20/02/ 2023

*This course provided fundamental skills and knowledge in geographical representation, data analysis, and surveying techniques, including:*

- **Cartography:** Understanding and applying various scales (simple, comparative, and diagonal) to create informative maps and diagrams.
- **Data visualization:** Constructing and interpreting diverse graphical representations like line graphs, bar charts, and specialized geographic graphs to analyze spatial data.
- **Weather analysis:** Interpreting weather maps, weather symbols, and instrument readings to understand atmospheric features and interpret daily Indian weather maps.
- **Relief representation:** Utilizing methods like hachure's, hill shadings, and contours to effectively illustrate different landforms on maps, and drawing cross-sections of various geographical features.
- **Basic surveying:** Understanding the purpose and types of surveying, and applying chain and tape surveying techniques like open and closed traverses to measure distances and map locations.

Nikita Kumari has demonstrated proficiency in these skills, showcasing a strong foundation for further geographical studies.

## CERTIFICATE OF EXPERIENTIAL LEARNING DEPARTMENT OF GEOGRAPHY

This certificate is awarded to  
Student Name - Saumya Biyala  
in recognition of successful completion of the B.A. Part I Geography Practical  
Date - 20/02/ 2023

*This course provided fundamental skills and knowledge in geographical representation, data analysis, and surveying techniques, including:*

- **Cartography:** Understanding and applying various scales (simple, comparative, and diagonal) to create informative maps and diagrams.
- **Data visualization:** Constructing and interpreting diverse graphical representations like line graphs, bar charts, and specialized geographic graphs to analyze spatial data.
- **Weather analysis:** Interpreting weather maps, weather symbols, and instrument readings to understand atmospheric features and interpret daily Indian weather maps.
- **Relief representation:** Utilizing methods like hachure's, hill shadings, and contours to effectively illustrate different landforms on maps, and drawing cross-sections of various geographical features.
- **Basic surveying:** Understanding the purpose and types of surveying, and applying chain and tape surveying techniques like open and closed traverses to measure distances and map locations.

Saumya Biyala has demonstrated proficiency in these skills, showcasing a strong foundation for further geographical studies.

Signature of Instructor

**PROF. SUNIL KUMAR SAINI**  
**ASSISTANT PROFESSOR**

# SETH GYANIRAM BANSIDHAR PODAR COLLEGE

Recognition of college under Section 2(f)/12(B), UGC Act, 1956  
Affiliated to Pandit Deendayal Upadhyaya Shekhawati University, Sikar

## CERTIFICATE OF EXPERIENTIAL LEARNING DEPARTMENT OF GEOGRAPHY

This certificate is awarded to  
Student Name - Shahrukh Chauhan  
in recognition of successful completion of the B.A. Part I Geography Practical  
Date - 20/02/ 2023

*This course provided fundamental skills and knowledge in geographical representation, data analysis, and surveying techniques, including:*

- **Cartography:** Understanding and applying various scales (simple, comparative, and diagonal) to create informative maps and diagrams.
- **Data visualization:** Constructing and interpreting diverse graphical representations like line graphs, bar charts, and specialized geographic graphs to analyze spatial data.
- **Weather analysis:** Interpreting weather maps, weather symbols, and instrument readings to understand atmospheric features and interpret daily Indian weather maps.
- **Relief representation:** Utilizing methods like hachure's, hill shadings, and contours to effectively illustrate different landforms on maps, and drawing cross-sections of various geographical features.
- **Basic surveying:** Understanding the purpose and types of surveying, and applying chain and tape surveying techniques like open and closed traverses to measure distances and map locations.
